+ ADD

Functional requirements	User story	No of Activity	Team Members
Studio	cafeteria menu display project would likely involve designing and implementing a digital menu board system. This would include choosing a layout and design, incorporating visuals like videos and animations, and potentially integrating data like customer reviews or inventory updates.	1	Sayyad Fathima Bee

Table	cafeteria menu display project refers to the narrative or theme that a menu aims to convey through its design and presentation, particularly when using table-based displays.	1	Sayyad Fathima Bee
Service Catalog	a digital menu board can be thought of as a service catalog. It's a structured list of available services (food and beverage items) that users can	1	Thoyika Soniya

	browse and select from		
Report	cafeteria menu display project should detail the project's objectives, the process of creating the menu, the rationale behind the design choices, and any challenges encountered and how they were overcome.	1	Sujatha Gorle
UI Action	cafeteria menu display project should detail the project's objectives, the process of creating	1	Sayyad Fathima Bee

	the menu, the rationale behind the design choices, and any challenges encountered and how they were overcome.		
Testing Service Catalog	A cafeteria menu display project can utilize the concept of a service catalog, particularly in the context of digital menu boards. This involves defining, categorizing, and testing the menu items as "services"	2	Suranna Malleswari

	<p>that are offered to customers.</p> <p>In the Cafeteria intended, and reflects changes in real time on the display</p>		
Testing UI Action	<p>Menu Display project, testing a UI action story involves verifying that user interaction such as clicking an "Update Menu" button correctly trigger updates to the displayed</p>		

	menu. The test ensures that the action is visible to authorized users, functions as.
